Ideas for your board:

Stick with colors that match
Don't leave any noticeable blank spaces on your board - try to evenly space the information you are displaying.
Keep your board clean of smudges...
You can create colorful borders or edges for your graphics
Perhaps you would like to add arrows
You can add three dimensional objects to your board, be practical though, not too bulky...
Have something to display that is placed on the table in front of your board (model or small objects)
Nice projects don't need to cost a lot of money, you have a lot of things around your home you can use
